Program no: 17

Aim:

Using PHP and MySQL, develop a program to accept book information viz.

Accession number, title, authors, edition and publisher from a web page and store the information in a database and to search for a book with the title specified by the user and to display the search results with proper headings.

Source Code:

Bookconnect

```
<?php
   $mysql_host='localhost';
   $mysql_user='root';
   $mysql_password='';
   $conn=mysqli_connect($mysql_host,$mysql_user,$mysql_password);
   if(mysqli_select_db($conn,'library'))
   {echo 'connection successful';
   }
   else{
      echo 'connection failed';
   }
   ?>
```

Bookinsert

```
<?php
include "bookconnect.php";
